

Concrete Surface Cosmetics Repair Material

Resi-Make (Powder & Liquid)

Used for :

1. Tarnished/Dirty surface of concrete products
2. Color matching for repaired parts of concrete products
3. Other surface cosmetics purposes

Features :

1. Combination of powder and liquid makes concrete surface beautiful.
2. No concerns about efflorescence due to no cement used.
3. Easily used with spray-gun and roller.
4. Good drying performance
5. Not come off with rain once dried due to high adhesion to concrete

How to use :

- Resi-Make is supposed to be used with combination of powder and liquid.
 - Refrain from using Resi-Make in case that a concrete surface is wet.
 - Remove dirt and dust before using Resi-Make.
 - Use spray-gun or roller.
1. Stir powder and liquid and mix them completely.
Standard mixing ratio(Powder : Liquid) = 1 : 1 to 1 : 2 * Volumetric-base
1 : 1.5 to 1 : 3 * Mass ratio
 2. Using spray-gun or roller, apply to concrete surface.
If the mixed liquid is precipitated, stir it again.
 3. Refer to SDS for safety measure.
